Sample Commands

- Deploy in group mode for all students in a CSV

```
python main.py --mode group --data-path /nvme_data2/class_data --fs-path
/nvme_data1/docker.service
```

- Deploy in single mode for a group (this should be used to refresh a broken container for a group)

```
python main.py --mode single --groupID [1] --data-path
/nvme_data2/class_data --fs-path /nvme_data1/docker.service
```

- Deploy in manual mode for 1 to 3 people

```
python main.py --mode manual --manual-username1 edward1
--manual-username2 edward2 --manual-username3 edward3 --data-path
/nvme_data2/class_data --fs-path /nvme_data1/docker.service
```

- Deploy with custom resource limits

```
python main.py [x] --cpu 16 --ram 64g --storage 100g
```
